ADVENTURE

## Safety Guide

### Before You Arrive

**Remember - you save £££s by booking online!**

If you're suffering from any viral or gastrointestinal illness, heavy cold or COVID-19 symptoms, however mild, for everyone's benefit, please stay home and only come see us when you're feeling better.

Take a look at our website and social media before you visit the farm for the most up-to-date information.

### What We're Doing To Keep You Safe

We are delighted to announce that following the easing of Covid-19 restrictions our site is now fully open, including the animal and reptile barns.

Hand sanitisers have been placed around the whole farm for your convenience, we still very much encourage hand washing.

We ask those using these car parks to observe social distancing and to behave responsibly.

Good hygiene and cleaning will be maintained in all public areas.

Areas of contact such as the arrival process and food takeaway services will be made with as little contact as possible.

Signage and markings will be in place as appropriate.

PPE for staff where necessary.

We would like to thank everyone who has supported us throughout the last 18 months, we know it will take time for things to return to pre-Covid normal, but if we all do our bit, we can all stay safe and have a fantastic time.

*Thank you from all of the Farmer Ted's team!*
